EDUCATION

SR University

Bachelor of Technology (B. Tech) – Computer Science

CGPA: 9.70

Warangal, India

July 2023 – May 2027

Suvidyaa Junior College

Intermediate

Warangal, India

June 2021 – April 2023

SKILLS SUMMARY

Languages: Python, JavaScript, SQL

Frontend: HTML, CSS, React

Backend: Node.js, FastAPI

Databases: MongoDB, PostgreSQL

Tools: Git, Github, Figma, VS Code, Power BI, Excel

Core Concepts: Data Structures & Algorithms, OOP, DBMS, REST APIs, SDLC, API Testing, Data Analysis & Visualization, System Design Fundamentals, Basic Machine Learning

PROJECTS

Smart Food Inventory Management System (MERN Stack):

[Github](#)

- Built a full-stack inventory system using React, Node.js, Express, and MongoDB for real-time inventory tracking
- Implemented expiry alert system, improving inventory monitoring efficiency by ~20% and reducing manual tracking effort by ~30%
- Designed and optimized REST APIs for secure authentication and efficient data flow
- Applied modular architecture to improve scalability and maintainability
- Handled concurrent updates using efficient backend logic to ensure data consistency
- Performed API validation and debugging to ensure reliable backend functionality and data consistency

Personal Finance Management Dashboard (FastAPI + PostgreSQL):

[Github](#)

- Designed a financial data processing system to analyze user spending patterns and generate meaningful insights
- Designed interactive data visualizations using Chart.js and improved financial tracking accuracy by 25%
- Ensured data validation, integrity, and consistency across API layers

- Tested API responses and validated data accuracy across backend workflows

Data Visualization Dashboard (Power BI):

- Designed an interactive dashboard to analyze ride booking data, tracking key metrics such as volume, cancellations, and revenue
- Built interactive Power BI dashboards to derive actionable insights from operational data
- Used data-driven analysis to identify trends and support informed decision-making

Responsive Furniture website using HTML, CSS and JavaScript:

- Created a responsive website using HTML, CSS, and JavaScript with optimized UI components
 - Improved user experience by enhancing website performance and responsiveness
 - Designed reusable components for better scalability and maintainability
-

ACHIEVEMENTS

- Solved 100+ problems focusing on arrays, hashing, and problem-solving patterns on LeetCode and HackerRank, strengthening problem-solving skills
 - Participated in Smart India Hackathon (SIH) and Tata Elxsi tech Events
 - Built 6+ projects involving full-stack development, analytics, and data visualization
 - Currently strengthening Dynamic Programming and advanced problem-solving skills through competitive coding practice
 - Built interactive dashboards using Power BI to derive insights from operational data
 - Practiced debugging, API validation, and problem-solving through hands-on project development
-

Certifications

- Infosys: Gen AI, Prompt Engineering, Computer Networks
- AWS Academy: Cloud Foundations, Cloud Developing
- Cisco: Data Analytics Essentials, Networking Basics
- Forage: Accenture Developer Simulation, Tata Data Visualization
